The new "GEMMA" series includes a wide range of LED Modules for sign lighting. The exclusive lens with prisms, the high efficiency LEDs and low luminous decay, allow to reduce the quantity of modules required per square meter compared to common modules and to illuminate in a homogeneous and efficient way with significant energy savings. The innovative sturdy structure and the facilitated removal of adhesive protection, significantly reduce installation and maintenance costs.

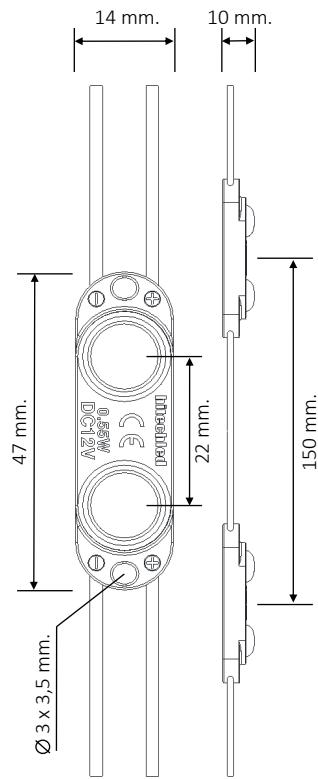

LED Module HM55-2

Applications

- Medium size channel letters illumination
- Backlighting of single sided light boxes, depth 40 to 120 mm.
- Linear lighting
- Architectural and decorative applications

Benefits

- The new prismatic lens not only optimally diffuse the light, but it minimize the dispersions allowing a conspicuous increasing of the efficiency and luminous homogeneity.
- The 3M VHB adhesive with the special protective film removal tab offers greater security and speed in fixing operations, contributing to cost reduction.
- Consistent white light 3-step MacAdam
- Color rendering index Ra: > 80
- Production date is marked on back of module for traceability
